Highest EV: AA +3.59 KK +3.12 QQ +2.83 JJ +2.57 AKs +2.34 TT +2.33 AKo +2.23 AQs +2.14

Barely +EV (near-indifferent): Q2s +0.01 J4s +0.01 J8o +0.01 74s +0.01 53s +0.01 K3o +0.02 95s +0.04

87o +0.04

Looks playable, quietly loses:

T5s -0.01

97o -0.02

76o -0.02

T4s -0.03

J3s -0.04

84s -0.04

43s -0.04

K2o -0.04

At twelve blinds the small blind jams 53% and the big blind calls 33%. The shoving range has finally started to shrink meaningfully — down from 58% at 10bb — because being called now costs 12bb instead of 10bb for the same 1.5bb prize.

This is roughly where a raise-fold strategy becomes genuinely better than pure jamming heads-up. The chart still tells you something essential: the hands below the jamming line are the ones you should never get all in with preflop, whatever line you take.

The big blind's calling range at 33% is now clearly value-weighted. Bluff-catching a 12bb shove with a hand like J9o is a losing proposition; hands that call profitably are pairs, aces, and the better kings.
