■ Raise (core) ■ Mixed ■ Fold

The range: 44+, A8s+, A5s-A4s, KTs+, QTs+, J9s+, T9s, 98s, ATo+, KJo+

15.5% of hands (206 combos)

Middle position in full ring is UTG with a little breathing room. The two extra folds in front of you remove the two tightest ranges from the pot, which is worth about three and a half percentage points of opening width — small pairs down to 44, weak suited aces down to A8s, and the suited one-gappers (J9s, T9s, 98s) all become profitable.

The hands that get added are almost all suited, and that is the pattern to internalise for every early seat: what makes a hand playable from up front is not raw high-card strength, it is the ability to make a hand that can stand a lot of pressure. 98s makes straights and flushes; K9o makes second-best top pair. Only one of them belongs in an early-position range.

The single biggest full-ring leak is opening the 6-max middle-position range (the 6-max hijack is ~21%) from 9-max MP. Those extra three players behind are worth real money, and the hands you would add — K9s, Q9s, offsuit broadways — are precisely the hands that get dominated when someone behind wakes up.
