UTG is the only seat where you are guaranteed to be out of position against the whole table post-flop. That single fact is what shrinks the range: hands like KJo or ATo make top pair with a bad kicker, get 3-bet by better, and then have to play the flop first for the rest of the hand. They belong in the mixed band, not the core opening range.

What survives is hands with either raw equity (pairs, big broadways) or the ability to flop a strong draw and keep the pot manageable (suited aces, suited connectors). Notice that the range is suit-heavy: A5s is in, A5o is out. That is not a style choice — suitedness adds roughly 2–3 points of equity and, more importantly, gives you flushes and backdoor flushes to continue with when the board runs out badly for one pair.

A common leak is opening this range to too large a size. UTG opens are usually 2.5bb in cash; the players behind fold often enough that you do not need a bigger raise to win the blinds, and a 3bb open just prices you into worse spots when the button flats.
